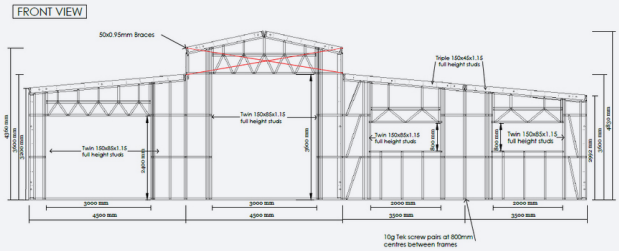
CENTRAL STEEL FRAMING

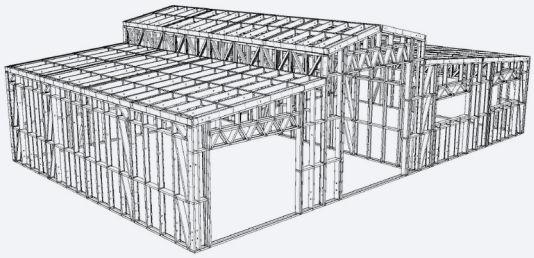
CSF 160 Heritage Barn Frame

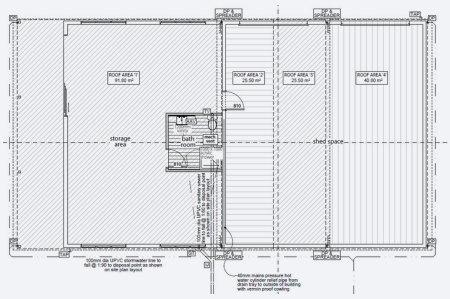
RRP
$22,450
+GST

The perfect barn for housing tractors, machinery and people, the CSF 160 Heritage Barn is a 160m2, pre-engineered, framed building, roll-formed from light-gauge steel. It has a footprint of 16m x 10m, with one of the lean-to's set up for accommodation if required.

The framing panels are made and pre-assembled in our factory, ready to be delivered to your site for assembly and cladding. The light steel panels are easy to handle and fast to assemble. We provide the calculations for council consent (PS1) to make the process quick and easy from start to finish.







Why build with steel?

- Straight and stable
- Easy to handle
- High strength to weight ratio
- Fire resistant
- 100% recyclable
